Abstract: The current research investigates the performance efficiency of Ufone compare with Mobilink. Data were both primary as well as secondary data. Secondary data related to industry was collected from web sites, pilot study, survey, newspaper, PTA Annual report, magazines and reports for generating awareness on the topic and for satisfying objectives of the study. To collect primary data a field survey was conducted with the help of structured interview schedule. Various demographic variables were considered and the questionnaire was tested. The respondents being the adopters of mobile phones are selected for conducting survey, the sample I choose to conduct the survey is based on 50, out of 50 I got the response from 40 on which statistical data analysis is based in this report. It was revealed that Mobilink Network Coverage whereas people are not satisfied with Ufone Network CoveragePeople use Mobilink are not satisfied with the call rates set by Mobilink, whereas the people using Ufone are much satisfied with the call rates set by Ufone. Mostly people use Ufone because of packages. The ratio of Mobilink users who attracts towards other network by watching ads is higher than Ufone users. Ufone attracts people more by advertisement of different packages as compare to Mobilink. The ratio of satisfied customers is higher in Mobilink. Ufone introduce more innovative services like Call block, Utunes, HisaabSms and etc. Most of the people viewed that CRM (Customer Relationship Management) of Ufone is not effective as Mobilink.

Key Words: Comprative Analysis, Mobilink, Ufone.
Introduction

There are lots of developments and changes happening around us. Nowadays as the users of mobiles are increasing, the numbers of subscribers of different mobile networks are also increasing therefore the competition between these companies is also increasing as well. Each company is offering various services everyday for the satisfaction of their subscribers & each subscriber avail these services according to their needs & wants. The cellular sector has witnessed significant growth in subscriber base both in rural and urban areas, over the last decade. With the increase in network coverage and competition being very tough, has resulted in decline of tariffs acting as catalysts for the growth in telecom sector. This potential growth in telecom sector and advance technology has attracted new players in the industry with their network that the intensity of competition has kept increasing day by day.

History Of Telecomm in Pakistan

Telecommunications in Pakistan describes the overall environment for the growing mobile telecommunications, telephone, and Internet markets in Pakistan. In 2008 Pakistan was the world’s third fastest growing telecommunications market. Pakistan's telecom infrastructure is improving dramatically with foreign and domestic investments into fixed-line and mobile networks; fiber systems are being constructed throughout the country to aid in network growth. The Telecommunications Ordinance of 1994 created the Pakistan Telecommunication Authority (PTA), Pakistan’s first independent telecommunications regulator, and the Pakistan Telecommunication Company Ltd (PTCL), a state-owned monopoly. Due to a lack of competition, local telephone call rates were high and international call rates were even higher. During the 1990s, a call to United States cost $5 per minute (300PkRs per minute), which was not affordable for most of the population. In addition customer service was poor; fixing a problem might take 10 to 15 days. Despite this, consumers had to stick with PTCL, as they had no other options.

This prompted the government to take a series of actions to improve the service by opening the telecommunications market. This was critical, but required a fine balance because opening the market and preserving PTCL were both important for the government.

In July 2003 the government introduced a Deregulation Policy for the Telecommunication Sector, which allowed and encouraged foreign companies to invest in the Pakistani telecommunications market. The centerpiece of the deregulation was the establishment of two categories of basic services licenses: Local loop (LL), for fixed line telecommunication within the 14 PTCL regions, and Long-distance and International (LDI), for connectivity between regions. Two sets of criteria set by the regulatory authorities must be met before an operator is allowed to start operation: one for the issuance of a license and another for the maintenance of service quality.

In 2006, Etisalat International Pakistan, a wholly owned subsidiary of Emirates Telecommunications Corporation, purchased a 26% stake in PTCL and assumed management control of the company.

Mobile Telecommunication

In January 2004 the Ministry of Information Technology issued its Mobile Cellular Policy with objectives to:

1. Promote efficient use of radio spectrum;
2. Increase choice for customers of cellular mobile services at competitive and affordable prices;
3. Encourage foreign companies to invest in the cellular mobile sector;
4. Recognize the rights and obligations of mobile cellular operators;
5. Provide for fair competition among mobile and fixed line operators; and
6. Provide an effective and well defined regulatory regime that is consistent with international best practices.

Subscriber base

The mobile telecommunications sector is seeing very large year-to-year growth in Pakistan. Approximately 90 percent of Pakistanis live within areas that have cell phone coverage and more than half of all Pakistanis have access to a cell phone. With 118 million mobile subscribers in March 2012, Pakistan has the highest mobile penetration rate in the South Asian region.

According to the Pakistan Telecommunication Authority (PTA), Mobilink continues to lead the market with 35.7 million subscribers, followed by Telenor with 29.3 million, Ufone with 23.1 million, Zong with 15.6 million, and Warid Telecom with 14.3 million. All telecom companies are working to broaden their networks in the Azad Jammu and Kashmir and Northern Areas, which were largely ignored until recently. Five of the seven Agencies of the tribal areas have mobile coverage.

SMS

Pakistanis collectively sent over 151 billion text messages during the year 2009. Nokia has cited Pakistan to be producing the third highest SMS traffic in the world in 2010.

Objectives Of the study:
The main objective is to conduct the comparative study between Mobilink & Ufone. Other objective of the study is to find out the consumer preferences, competitive strategies, choices and various services offered by telecomm companies.
The suggestions and key findings may be help the telecomm companies to improve their network efficiency and other services.

**Research Methodology:**

Data were collected from primary as well as secondary data. Secondary data related to industry was collected from web sites, pilot study, survey, newspaper, PTA Annual report, magazines and reports for generating awareness on the topic and for satisfying objectives of the study. To collect primary data a field survey was conducted with the help of structured interview schedule. Various demographic variables were considered and the questionnaire was tested. The respondents being the adopters of mobile phones are selected for conducting survey, the sample I choose to conduct the survey is based on 50, out of 50 I got the response from 40 on which statistical data analysis is based in this report.

**Limitations:**

No matter how efficiently the report is conducted, it can not be perfect in all aspects. This study was conducted in accordance with the objective of report completion. The study may not include the broad explanations of facts & figures due to the nature of the research.

One of the major limitation while carrying out this research was the lack of cooperation on the part of the management of Mobilink&Ufone in providing the data regarding the company and its policies.

Secondly, the limitation which affects the study is the restriction on mentioning every fact of the company due to the problem of the secrecy. In addition, the availability of require data was a problem as access to all the documents and files are limited to employees only.

Finally, the problem of short time period also makes the analysis restricted as one can not properly understand and thus analyze all the operation of any company in a very short time of 2 weeks.

**Company’s Profiles**

**Mobilink Company Profile**

**About Us**

Pakistan Mobile Communications Limited (PMCL) better known as Mobilink GSM is a telecommunication service provider in Pakistan. Mobilink started operations in 1994 as the first GSM cellular Mobile service in Pakistan by MOTOROLA Inc., later it was sold to Orascom, an Egypt-based multi-national company. It has become the market leader both in terms of growth as well as having the largest customer subscriber base in Pakistan.

Mobilink is Pakistan’s leading provider of voice and data services, bringing more people together through service excellence and product innovation. With more than 36 million subscribers, Mobilink maintains market leadership through cutting-edge, integrated technology, the strongest brands and the largest portfolio of value added services in the industry, a broadband carrier division providing next generation internet technology as well as the country’s largest network with over 9,000 cell sites making everyday a better day for its customers.

Housing Pakistan’s largest distribution and contact centre networks and an unparalleled 6,500 kilometers fiber optic backbone, Mobilink has already invested over US $3.9 billion in the country to date, with another USD 1 billion being invested in network modernization. Mobilink provides uninterrupted countrywide connectivity, unmatched customer services and international roaming in over 140 countries.

As a responsible corporate citizen, Mobilink offers a range of socially inclusive products and services dedicated to enhance access to information. Through Mobilink Foundation, the company passionately supports education, health and environmental initiatives and promotes sustainable business practices.

Mobilink offers exclusive & personalized tariff plans that empower customers and cater to the communication needs of a diverse group of people, from individuals to businessmen to corporate and multinationals.

**Our Vision, Values and Mission**

**Mobilink’s Vision**

To be the leading Telecommunication Services Provider in Pakistan by offering innovative Communication solutions that make each day better for our customers while exceeding Shareholder value & Employee Expectations.

**Mobilink’s Values**

Be Passionate

We at Mobilink, are passionate about fulfilling & exceeding customer needs and enriching their lives everyday.

Be Professional

We take pride in practicing the highest ethical standards and take responsibility for our actions.

Lead With Purpose
We are committed to lead the market through innovations in new services, products, as well as cutting edge technologies and solutions.

Corporate Responsibility

Mobilink believes in playing an active role in supporting the community and social development of Pakistan. Our Corporate Responsibility goes beyond philanthropy and donations whereby we take into full account the impact that Mobilink creates on all stakeholders and on the environment when making decisions.

We recognize that an educated, healthy society is Pakistan’s key to ensuring sustainable development and we do our best to give back to the community we operate in.

Coverage

Where other networks fail, ours connects instantly. On highways & byways, throughout thousands of destinations across Pakistan, only Mobilink has you fully covered. So no more mixed signals, because only Mobilink talks to you loud & clear.

Mobilink provides the widest coverage network, covering more than 10,000+ cities, towns, and villages across Pakistan. It connects over 31.6 million family members every second of the day with exceptional voice quality due to its broad coverage. Our coverage is expanding day by day, and soon, the only other thing covering Pakistan more than Mobilink would be the clear blue sky.

The type of coverage service Mobilink provides is divided into three main categories:

- PHYSICAL PRESENCE (Mobilink has physical infrastructure in the area)
- INDOOR SPILLOVER COVERAGE (High coverage level in adjoining area)
- OUTDOOR SPILLOVER COVERAGE (Medium coverage level in adjoining area)

Along with nationwide coverage, Mobilink also provides true International Roaming in over 140 countries with more than 300 partner operators worldwide.

Our Business Network Advantage

Over the last 18 years, Mobilink has set up one of the largest cellular networks in the country. Currently, we are covering more than 20,000+ cities and towns. This has involved an investment in the company of more than US$ 3.9 Billion. We have more than 8,500 cell sites and the number keeps growing at a rapid pace. We also have deployed around 6,500 km of optical cable across Pakistan.

Ufone Company Profile

Company Profile

Pak Telecom Mobile Limited (PTML) is a wholly owned subsidiary of...

...Pakistan Telecommunication Company Limited (PTCL) that started its operations in January 2001 under the brand name ‘Ufone’. As a result of PTCL’s privatization, Ufone became a part of the Emirates Telecommunication Corporation Group (Etisalat) in 2006.

Since its inception, Ufone has focused on the people of Pakistan, empowering them with the most relevant communication modes and services that enable them to do a lot more than just talk, at a price that suits them the most. Along with the claim of lowest call rates, clear sound and best network, Ufone offers its customers simplified tariffs with no hidden charges. With a strong and uniquely humorous communication direction that has now become Ufone’s signature across all advertising media, Ufone gives its customers many reasons to smile.

This customer focus and best offering has allowed Ufone to build a subscriber base of over 24 million in less than a decade. Ufone has network coverage in 10,000 locations and across all major highways of Pakistan. Ufone currently caters for International Roaming to more than 288 live operators in more than 160 countries. Ufone also offers Pakistan’s largest GPRS & BlackBerry Roaming coverage available with more than 200 Live Operators across 122 countries. More recently, Ufone has become a focused and intensive leader in VAS, constantly introducing innovative services, which have been the first of their kind in the Pakistani cellular industry.

As the world of telecommunications advances, Ufone promises its customers to stay ahead, developing and evolving, to go beyond their expectations, because at Ufone, it’s all about U.

Mission Statement

To be the best cellular option for U.

Story of Our Brand

At Ufone, it’s always about you…

...In order to evolve with our customers and to keep pace with your needs, we rejuvenated and revamped our image by changing our visual identity
At Ufone we understand the value of words and the need to communicate effectively and efficiently at all levels of society, which is why our primary focus is on U, our valued customers bring strength to our company.

With a fresher look than is accepted and appreciated across the board by people of all ages, we aim to connect with you and provide you state of the art services. No matter who you are, where you are, what you want to say, how you want to say it or how you feel, you are our focus. Because at Ufone, it’s all about U!

Coverage

We are, where you want to be...

...At Ufone we aim to provide you with wider coverage, superior connectivity, clear signals & voice quality

Covering several key destinations your Ufone is the ultimate means to stay connected wherever your business takes you allowing seamless roaming through the network providing the best nationwide coverage.

Comparative study of Promotion & advertising Campaign Of Mobilink&Ufone

Advertisement:

Any paid form of non-personal presentation or promotion of ideas, goods, or services by an identified sponsor. Introduction

Today to be a successful business, the firms need to make a distinctive position in the customer’s minds to obtain the monetary benefits of being different and better than their competitors. Some industries require more such image positioning than others due to their nature of business. The proposal that I am submitting is concerned with one such industry and specifically of two companies that have tried to retain customers through very aggressive marketing more specifically in our research’s case. Researcher has done a comparative study of Cellular network advertising strategy of Ufone in contrast of Mobilink Jazz. Comparative advertising inducts the specific mention or presentation of competing brand(s) and a comparison is made or implied. It has been used for quite a long time. It has of course its own advantages and disadvantages; for which it has been banned in some countries whereas appreciated in others like for example, in the United States it is allowed for the sake of free competition whereby in South Africa it is Illegal for direct defaming and insulting competitors which is not an uncommon thing in comparative advertising. We however look at the Pakistani perspective and market nature of the mentioned two telecommunication giants and what results in terms of customer purchase and usage has these advertisements on them. The competition between Ufone and Mobilink jazz is heating up. We can also refer it as a war between Ufone and jazz. Mobilink Jazz started this war when it mocked Ufone commercial and directly attacked Ufone. as expected Ufone has done a counter attack by mocking and making fun of jazz's package and commercial as well. Now there is clear wars going on between these two brands both are making fun of each other and mocking each other's.

Mobilink Promotion

Companies can do more than make good products—they must inform consumers about product benefits and carefully position products in consumers’ minds. To do this, they must skillfully use the promotion tools of advertising, sales promotion, public relations, sales force, direct marketing, and personal selling.

Mobilink Advertising Objectives

The chief advertising goal of Mobilink is to increase its customer base and to stimulate more usage.

Mobilink is currently using:

· Information Advertising: To create brand awareness and knowledge of its Mobilink World brand.
· Reminder Advertising: To stimulate the repeat purchase of its Jazz and Indigo brands.

Mobilink Advertising Budget:

Since the competition is intense in the telecommunication market, Mobilink has a significant advertising budget. It is advertising heavily to be heard and to constantly remind its target market to go for Mobilink. However, Mobilink’s actual advertising budget was not disclosed by the management.

Mobilink Developing Ad Campaigns:

The advertising theme “Mobilink: It’s simply a way to communicate”, is designed to demonstrate the new service’s simplicity and convenience.

Along with its service debut, Mobilink launched a nationwide campaign composed of television commercials and print ads. The national campaign is supplemented by local and regional ad campaigns produced by the Mobilinklicenceses. The national print and broadcast ads are designed to be localized.

The success of Mobilink has not only to do with its increased offerings, but also has a great deal to do with the campaigns that Mobilink comes up with. The TV ads exude energy and liveliness, and an expressive color and lightning palette, the high frequency and visibility makes these advertisements noticeable which results into increased brand awareness and brand loyalty boosting sales.

Mobilink Advertising Media
Mobilink is using television, print, and radio advertising media to disseminate its message and to build a brand preference but the most preferred is television since this medium is the most powerful, reaches a broad spectrum of consumers and has the maximum customer impact.

• Radio: It has a relatively large listeners’ base and so is an effective way to communicate the message.

• Billboards and Print Media: The Company has come up with elaborate campaigns, billboards and posters to promote Indigo, their post-paid brand

Mobilink Brand Ambassadors:
Mobilink in its advertising went on a different route (now copied by competitors) by starring the most charismatic superstars in its advertisements. The tested method of having a pretty face holding a Jazz card makes its advertising campaigns booming. Strings, Ali Zafar, Nargis Fakhri, Vaneeza Ahmad, Shaan, Iman Ali, Zainab Qayyum, Wasim Akram, and Shahid Afridi are some of celebrities associated with Mobilink.

Ufone Promotion
Ufone is heavy investor on advertisement. Owing the growing competition in cellular telephonic services, Ufone strategize to increase its effect on market through aggressive promotion and advertising.

Ufone has its own Advertising department because its packages change by time to time. Ufone advertising department is responsible for making ads and promotion.

Ufone Advertising Objectives:
Ufone informs its customers about new or available services. Ufone seeks to persuade people to purchase their services or to switch to their connection from other connections.

Ufone Advertising Budget
A single ufone advertisement played 15-20 times per day on a tv channel costs million of rupees varying with the time of day when it is played. Ufone spent about 20% of its profit on advertising and sales promotion.

Ufone Developing Ad campaign:
The very first content of ufone advertising message was humorous, then ufone shifted its message content to youthful excitement, But now ufone again adopted humorous theme for its message content.

The format of ufone advertisement is always colorful and eye catching. The shocking orange & green always attract people & also looks beautiful on wall printing of ufone.

Ufone Advertising Media
Ufone Advertise in following media types:

• Print Media: Ufone tries and print ads in all leading newspaper including The DAWN, JUNG, NAWAI WAQT, & Local Sindhi Newspaper as well.
  Ufone place its ads on all leading magazines as well i.e Sunday Magazine, Akbar-e-Jehan, Libaas, Mag etc.

• Broadcast Media: Ufone tries and advertise on all Pakistani channels including Geo, Hum, Aryetc and also plays its advertise on local channels of Sindh, Punjab. And also on Radio as well.

• Display Media: Ufone Advertise using Vehicles like Bill boards, Hoardings, Signs, Posters, Wall Paintings etc.

• Special Vehicle: SME Multan has used a new and innovative vehicle in display media i.e Ufone’s Painted Rikshaw.

• Internet is used as online media to advertise ufone ads.

• Events: Ufone has sponsored many events in the past and holds future plans concerning it. The famous event sponsored by ufone in 2006 was a series of musical concerts did all over Pakistan, featuring Meekal Hassan and Junoon, it named UROCK.

Ufone Brand Ambassadors
The very first ufone advertisement had Faisal Qureshi as a message source, afterward ufone hired non celebrity + celebrity young models for its youthful message theme.

Ufone also hired three lollywood stars Meera, Jia Ali, Veena Malik with Meekal Hassan.
Finally Ufone has again hired Faisal Qureshi, Meekal Hassan, Adeel Hashmi, the strategy behind hiring this trio is they are economical and personal favorites of people.
Ufone always hire endorsers in group.
